# Warehousing & Distribution

ASN Logistics provides warehousing and distribution centers for companies with a need for a high-performance, yet flexible infrastructure. Through our shared logistics capabilities, our customers gain the benefits of our customized services.

We offer real-time access to inventory status using a simple, intuitive method in managing your inventory. Our state of the art system includes bar code scanning, compliance labeling, space optimization and value-added support services. We offer a wide variety of warehousing, distribution, and value-added services designed to speed up your supply chain as efficiently and cost-effectively as possible. By utilizing our efficiencies and experience to reduce your total cost of Warehousing and Distribution, your company can focus its time and money on what really matters in your industry instead of wasting valuable resources on logistics.

## Benefits of an Optimized Warehouse

S

### Saving

Realized through reduced energy use, labor and maintenance

OE

### Operational Efficiency

Achieved through increased safety, productivity and reallocated resources

F

### Flexibility

Components provide control over your lighting environment with tools that evolve as your operation does.

## Warehouse Management System

A warehouse management system (WMS) is a type of software used to manage operations in a warehouse including inventory management, picking processes, and auditing.

A WMS is an instrumental part of the supply chain, the primary goal of which is to track and control the movement and storage of product or materials within a warehouse, and process the associated inventory actions, including: receiving, adding, picking, quality control, shipping, reporting, and forecasting, with the addition of listing and channel management, should the company be involved in eCommerce.

**OPTIMIZE YOUR WAREHOUSE.  
MAXIMIZE YOUR RETURN.**
